PREFACE

This book, Wearable Devices has been written to serve the needs of under graduate Students to provide an adequate knowledge Wearable Technology used in real world environment. This book is designed to meet the requirement of revised syllabus prescribed by the Anna University, Chennai for engineering students of its affiliated colleges.

This book consists of 5 units as follows.

Unit I deals with Wearable Systems, Applications of Wearable Systems, Types of Wearable Systems, Components of wearable Systems and Sensors for wearable systems.

Unit II provides the knowledge of Wearability issues -physical shape and placement of sensor, Technical challenges sensor design, signal acquisition, sampling frequency for reduced energy consumption, Power Requirements and Thermopiles.

Unit III discussed about Need for wireless monitoring, Definition of Body area network, BAN and Healthcare, Technical Challenges- System security and reliability, BAN Architecture.

Unit IV deals with Introduction to smart textile- Passive smart textile, active smart textile. Fabrication Techniques Conductive Fibres, Treated Conductive Fibres, Conductive Fabrics, Conductive Inks. Case study

Unit V addresses the Medical Diagnostics, Medical Monitoring-Patients with chronic disease, Hospital patients, Elderly patients, neural recording, Gait analysis, Sports Medicine.

Finally this book also contains the unit wise important two mark questions with answers and some previous year university question papers with key answers.

Authors

MR. C. SILAMBARASAN

MR. R. SUNDARAM

ACKNOWLEDGEMENTS

I express my heartfelt gratitude's to Thiru. M. Thangavel, Chairman, Mr. T. Vijay Ganesh Secretary, Mr. T. Senthil Kumar Treasurer, Ganesh College of Engineering, Salem for their support.

I wish to express my sincere thanks to the Principal Dr. M. Subas Chandrabose, M.E, Ph.D, who has been encouraging me in all aspects.

I submit my sincere thanks to Mr. M. Prakash, AO, Ganesh College of Engineering, Salem.

I would like thank to Jeyam Publications for their tireless effort in overseeing the production of the book in its various stages and also for advertising and marketing the book.

MR. C. SILAMBARASAN

MR. R. SUNDARAM

CONTENTS

UNIT 1

	INTRODUCTION TO WEARABLE SYSTEMS AND SENSORS	1.1 - 1.52
1.	Wearable Systems - Introduction	1.1
1.1.	Features of Wearable Devices	1.1
1.2.	Objectives of Wearable Technology	1.1
2.	Need for Wearables Systems	1.2
2.1.	Elements of Wearables Systems	1.4
2.2.	Layers of Wearables Systems	1.4
2.3.	Importance of Wearable Systems	1.4
3.	Drawbacks of Conventional Systems for Wearable Monitoring	1.7
4.	Applications of Wearable Systems	1.8
5.	Types of Wearable Systems	1.13
5.1.	Smart Watches	1.13
5.2.	Fitness Trackers	1.13
5.3.	Smart Jewelry	1.13
5.4.	Game Simulators	1.13
5.5.	Smart Clothing	1.14
5.6.	Smart Glasses	1.14
5.7.	Heartbeat Trackers & Blood Pressure Monitors	1.14
5.8.	Smart Earbuds	1.14
5.9.	Smart Contact Lens	1.14
5.10.	Implementation Scenario of Wireless Body Area Network	1.14
6.	Components of Wearable Systems	1.16
7.	Sensors for Wearable Systems	1.19
7.1.	Different Sensors	1.19
7.2.	2. Different Sensors used in Smart Clothing	1.20
7.3.	Different Sensors used in Smart Clothing	1.21

- 1.8. Inertial Movement Sensors
- 1.9. Respiration Activity Sensor
- 1.9.1. Physiological Sign Sensors
- 1.9.2. Respiration Activity
- 1.9.3. Direct and Indirect Methods.....
- 1.10. Inductive Plethysmography
- 1.10.1. Working Principle
- 1.11. Impedance Plethysmography.....
- 1.11.1. Working Principle
- 1.12. Pneumography
- 1.12.1. Pneumography based on Piezoresistive Sensor
- 1.13. Plethysmography based on Piezoelectric Sensor.....
- 1.13.1. Function of Plethysmograph Sensor
- 1.13.2. Working Principle
- 1.13.3. Galvanic Skin Response.....
- 1.13.4. Pulse Oximetry.....
- 1.14. Wearable Ground Reaction Force Sensor.....
- 1.14.1. Radiant Thermal Sensors
- 1.14.2. Construction and Fabrication.....
- 1.14.3. Biochemical Markers
- 1.14.4. Gas Sensors.....

Two Mark Questions with Answers

Review Questions

UNIT II

SIGNAL PROCESSING AND ENERGY HARVESTING FOR WEARABLE DEVICE

- 2.1. Wearability Issues
- 2.2. System Shape and Placement of Sensor.....
- 2.3. Technical Challenges - Sensor Design, Signal Acquisition.....

4. Sampling Frequency for Reduced Energy Consumption.....	2.5
5. Power Requirements of Wearables.....	2.5
6. Thermopile.....	2.28
Two Mark Questions with Answers.....	2.31
Review Questions.....	2.35

UNIT III

WIRELESS HEALTH SYSTEMS 3.1 - 3.35

1. Introduction.....	3.1
2. Need for Wireless Monitoring.....	3.2
3. Definition of Body Area Network.....	3.3
4. BAN and Healthcare.....	3.6
5. Technical Challenges.....	3.10
6. System Security and Reliability.....	3.12
7. BAN Architecture.....	3.17
Two Mark Questions with Answers.....	3.31
Review Questions.....	3.35

UNIT IV

SMART TEXTILE 4.1 - 4.32

1. Introduction to Smart Textiles.....	4.1
2. Passive Smart Textiles.....	4.1
3. Conductive Fibres.....	4.8
4.3.1. Types of Conductive Fibers.....	4.9
4.3.2. Applications of Conductive Fibers in Wearable Technology.....	4.9
4.3.3. Challenges and Future Directions.....	4.10
4.3.4. Methods of producing conductive textiles are summarized as follows.....	4.10
4.3.5. *Types of Conductive Textiles.....	4.10
4.3.6. Properties of Conductive Textiles.....	4.12
Fabrication Techniques for Conductive Fibers.....	4.13

C.4

4.4. Treated Conductive Fibers..... A.1

4.5. Conductive Fabrics A.1

4.6. Conductive Inks A.1

4.7. Case Study Smart Fabric for Monitoring Biological Parameters A.1

 4.7.1. Smart Fabric for Monitoring Biological Parameters - ECG..... A.1

 4.7.2. Smart Fabric for Monitoring Biological Parameters - Respiration A.1

Two Mark Questions with Answers A.1

Review Questions A.1

UNIT V

APPLICATIONS OF WEARABLE SYSTEMS

5

5.1. Applications of Wearable Systems in Medical Diagnostics.....

5.2. Patients with Chronic Disease Monitoring Devices

5.3. Medical Monitoring with Chronic Diseases, Hospital Patient and Elderly

5.4. Neural Recording

 5.4.1. Electrophysiology

5.5. Gait Analysis.....

5.6. Sports Medicine.....

Two Mark Questions with Answers.....

Review Questions

Solved Anna University Question Paper.....

UNIT 1

INTRODUCTION TO WEARABLE SYSTEMS AND SENSORS

Wearable Systems - Introduction, Need for Wearable Systems, Drawbacks of Conventional Systems for Wearable Monitoring, Applications of Wearable Systems, Types of Wearable Systems, Components of wearable Systems. Sensors for wearable Systems - Inertia movement sensors, Respiration activity sensor, Inductive Plethysmography, Impedance plethysmography, pneumography, Wearable ground reaction force sensor.

1. WEARABLE SYSTEMS - INTRODUCTION

Wearable technology is any kind of electronic device designed to be worn on the user's body. Such devices can take many different forms, including jewelry, accessories, medical devices, and clothing or elements of clothing.

The term wearable computing implies processing or communications capabilities, but in reality, the sophistication among wearables can vary.

The most sophisticated examples of wearable technology include artificial intelligence (AI) hearing aids, Google Glass and Microsoft's HoloLens, and a holographic computer in the form of a virtual reality (VR) headset. An example of a less complex form of wearable technology is a disposable skin patch with sensors that transmit patient data wirelessly to a control device in a healthcare facility.

1.1. FEATURES OF WEARABLE DEVICES

- Activity Monitoring.
- Bluetooth Enabled.
- Digital Display.
- Health Monitoring.
- Location Tracking.
- Smart Watches.
- Water Resistant / Outdoor Rated.
- Wrist

1.2. OBJECTIVES OF WEARABLE TECHNOLOGY

Most common uses for wearable technology are for helping to monitor and alert the user about their health information or for social communication purposes - calling, texting, social media, etc.
